Genes by Environment
Modeling · Mechanisms · Mapping

Module Name: Plant Identification

Institution: Boise State University

Principle Investigator(s): Amy Ulappa, amyulappa@boisestate.edu

Summary:

In this lab, students will identify four angiosperms and develop understanding of their role in the environment.

This module has been used in BSU's General Biology II (BIO 192) course.

Contents:

- Lab: Identifying Angiosperm Vegetative Structures
- SamplePoint Identification Key
- Video: [Introduction by Jennifer Forbey](#)
- Video: [Case Study Instructions](#)

Notes:

- Videos currently require a Boise State login. If you use this module, arrangements will be made for you to access them.
- Please contact the project PI or the GEM3 PUI Liaison for assistance in deploying this module in your course.

Questions? Contact the PI or the GEM3 PUI Liaison, Stephanie Sevigny, stephanieseigny@boisestate.edu
